10 min.... Furthermore every child over four years must have a social security number or you'll not file for deduction. There's so many things you don't know about that's just taken place. What it's come to and this is good news in this respect it's getting more and more and more like the first time Jesus came to this earth in the form of a human being. This last time it's in the form of the Holy Spirit and the Pillar of Fire. And notice the tax collectors; notice the exorbitant in taxes and the IRS is a law unto itself. And you will not be excused if you're delinquent in your taxes. They will treat you like a criminal. This is the law. You'll get penalty upon penalty upon penalty, now that's the law that's invoked this minute. So you be very careful and very prayerful. We're getting closer to the end time.

12min....But the good news I said is more and more that hour that something is going to happen, and Brother Braham kept saying something is going to happen and you know something's been happening all along; been all along.

33min ... we're grateful too the Lord heals, maybe sometimes that healing is slow but you know Brother Branham never did play up the fact of the gift of the healing or the miracle as much as he told us to hold to that Word. He said, "*God said He would do it. And as far as God is concerned, it is done*". Now He didn't say *when* He would do it. When He said let there be light he said could have been millions of years before one ray of light appeared. Now I know that is a little difficult in these times when you need healing and you're anxious for it, but it pays to hold on to the Lord Jesus Christ for our help.

34min 45 sec.... Listen Brother Branham wasn't any fool. He never played science against the Bible the Bible against science and man against man, this and that. He laid it the way it was and he said, *The good is taken out of the soil.*" And he said, "*There's nothing left in the soil.*" He said, *Therefore man...if the body turns to mush, what about the brain.* And he advocated a healthy type of living and had William Branham lived, I can tell you categorically that he would not be eating in restaurants; he'd be eating as healthy as a man could possibly eat. When he was taken from this world, his arteries were like a 16 year old boys arteries.
